

Muhammad Arham Khan

Karachi, Pakistan
arham404khan@gmail.com | 03112868062

I am a skilled web developer with 2 years of experience in front-end and full-stack development. Proficient in various technologies including HTML, CSS, JavaScript, React.js, PHP, Laravel, Python, and machine learning, I have successfully delivered projects that enhance user experience and streamline processes. My expertise includes developing responsive web designs, creating user-friendly applications, and building efficient systems using modern web technologies.

Projects

Recommendation System - Netflix Tv Shows

<https://netflix-shows-recommendar.streamlit.app/>

Tools: Python + Machine Learning

I built this project using a dataset of **3,000 Netflix shows**. It's a content-based recommendation system leveraging machine learning, showcasing a hands-on **Machine Learning** project.

Sentiment Analysis Python App

<https://arhamkhanportfolio.vercel.app/videos/projects/1.mp4>

Tools: Python + Flask + Assembly AI API

Developed a project using **Python** and **AssemblyAI** to analyze and classify conversations. The application identifies the number of negative, positive, and neutral words and determines the overall sentiment of the conversation as positive, negative, or neutral. It supports recordings of up to 5 minutes.

Web Builder Python App

<https://arhamkhanportfolio.vercel.app/videos/projects/2.mp4>

Tools: Python + Flask + Web Scrapping

Built a user-friendly web builder with **Python** and **Flask**. Users can easily create websites by selecting prebuilt sections from various designs. Sections are dynamically fetched, demonstrating my innovation in web development

Text To Speech React App

<https://text-to-speech-react-app.vercel.app/>

Tools: React JS + Elevenlabs API

Developed a project using **React.js** and the **ElevenLabs API** to convert text into speech. The application supports up to 200 characters and includes 47 different voices, featuring both male and female options.

LMS Using Laravel

<https://arhamkhanportfolio.vercel.app/videos/projects/3.mp4>

Tools: PHP - Laravel

Developed a **Learning Management System (LMS)** using **PHP** and **Laravel**. This project streamlines the learning experience and demonstrates my skills in building efficient and scalable web applications.

Web Design Brand

<https://webcodehaven.vercel.app/>

Tools: HTML + CSS + JS

Created a fully responsive web design for a company using **HTML, CSS, and JavaScript**
